# Itinerant Registerable Plant Training Course What has Changed?

## 2022 Course Update

Former “Itinerant Classified Plant Training” now called “Itinerant Registerable Plant Training”.

By Peter Burse

## Training Course Updates

Following the introduction of the new WHS laws and regulations “Itinerant Classified Plant” is now called “Itinerant Registerable Plant”. AME followed suite and changed the course name to Itinerant Registerable Plant Training alongside other vital changes to the curriculum.

The new WHS Act 2020 and WHS (Mining) Regulations 2022 came into effect on 31 March 2022 and replaced the previously applicable Mines Safety & Inspection Act 1994 and the associated Mines Safety & Inspections Regulations 1995.

If you own Itinerant Registerable Plant, it’s imperative to understand your registration and inspection requirements. The aim of our industry leading training course is to give you a fundamental understanding of Itinerant Registerable Plant and associated registration and inspection obligations to remain compliant.

The course structure and existing key modules remain.

## Key Modules

- Definition of Itinerant Registerable Plant
- Design registration requirements of Itinerant Registerable Plant
- Inspection obligations and compliance
- Rules for appointment of Registerable Plant Inspector
- Responsibility & accountability of Appointed Person(s)
- Contractor requirements for Itinerant Registerable Plant Site Access
- Document checks and visual safety inspections
- Broader mine site requirements

## New Course Content

In addition to the existing course content, we will now also address and cover the following:

- Changes to Itinerant Registerable Plant requirements under the WHS Mines Regs 2022 including the new exemptions to registration.
- The new requirement for both design and plant registration in the mining sector.
- New definitions for what constitute a competent person.
- Who is allowed to carry out major inspections for mobile cranes.
- Section 5.2 The registration of plant.
- Changes to the Mine Management Structure, Mine Operators, Senior Site Executives and Statutory Supervisors.
- The implementation (if required), maintenance, review, audit and continuous improvement of the Mine Safety Management System.
- Inspection requirements under the applicable standards for pressure vessels, mobile cranes, bridge cranes, gantry cranes and vehicle loading cranes.

- Inspection requirements for hoists and work platforms and the new exceptions for scissor lifts.
- Hazard level calculations.
- Who can inspect, maintain, and keep records of Itinerant Registerable Plant on a mine site?

The above list of updates doesn't necessarily represent all changes to our new course outline, but it provides you with a better idea about the main changes you need to be aware of.

## What to Do Next?

To remain up to date with the latest WHS changes, we encourage you to take part in our updated Itinerant Registerable Plant Training Course.
