

AME

Statutory

Supervisors Training.

Recognition of Prior Learning.

Our strategic alliance with Australian Training Management. RTO #2431.

Asset Management Engineers has a strategic partnering arrangement with Australian Training Management (ATM), a Registered Training Organisation (RTO Registration Number: 2431). This collaboration with ATM providing assessment services and AME facilitating the training ensures that our Statutory Supervisors training meets all regulatory standards.

Upon successful completion of the Statutory Supervisor training units, participants will receive a statement of attainment issued by ATM. We are committed to maintaining the highest level of training excellence and compliance.

The strategic alliance with ATM provides approval for AME to market the statutory supervisor training.

Achieve Statutory Supervisor Competency Through Streamlined RPL.

Leading a high-performance team in the mining industry requires a skilled and qualified workforce. Equipping your team with the necessary certifications, like Statutory Supervisor competency is crucial for ensuring safety, compliance, and operational efficiency.

However, traditional training can be time-consuming, disrupt work schedules, and require significant resources. Asset Management Engineers (AME) offers a solution.

Train Your Entire Team Efficiently:

- Reduce Cost & Downtime: Eliminate the need for individual training schedules. Enrol large teams for significant cost savings and minimal disruption to your operations.
- Streamlined Process: We handle the RPL assessments efficiently, allowing your team to focus on their core responsibilities.
- Fast Track Competency: Get your entire team certified as Statutory Supervisors in a shorter timeframe.

Benefits of RPL for Statutory Supervisor Units of Competency:

- Save Time & Money: Skip unnecessary training for qualified individuals.
- Fast Track Careers: Expedite certification for your team, enhancing their qualifications.
- Gain Recognition: Formally acknowledge the expertise within your workforce.
- Flexible Learning: Focus on areas requiring additional training for a select few.

Who is Eligible for RPL?

- Mining professionals with a strong background in workplace safety, and the everyday operational requirements on site.
- Individuals with proven experience in supervising work activities in the mining industry.
- Those who have completed relevant training courses but lack formal qualifications.

RPL Process at AME:

Our RPL process is designed to efficiently evaluate your existing skills and knowledge against the required units:

- BSBWHS411 – Implement and monitor WHS policies, procedures, and programs.
- RIIRIS402E – Carry out the risk management process.

Important to Note.

If you can not provide the evidence required for recognition of prior learning, then you will be denied the RPL entry pathway and will be required to undertake training to attain the required units of competency.

Some mine operators through internal policy and procedure require supervision to undertake the training and not enter an RPL process.

Here's How it Works:

1. Complete Provided Documents: We provide all the necessary documentation to map your experience to the competencies. Simply fill in the blanks and showcase your expertise.
2. Pass a General Knowledge Assessment: Demonstrate your core knowledge in WHS and risk management principles.
3. Gather Existing Workplace Evidence: Compile documents and records you already generate as part of your standard operational duties. AME will guide you on the types of evidence required.
4. Obtain a Third – Party Report: This report is already composed by AME all you need is your direct report to confirm your on the job capabilities.

Benefits of AME's RPL for Statutory Supervisors:

- Fast Track Your Career: Achieve certification quicker compared to traditional training.
- Leverage Existing Expertise: Get credit for your valuable work experience.
- Streamlined Process: Our experienced assessors guide you efficiently.
- Cost Effective Solution: Save time and resources on unnecessary training modules.

Course Cost:

\$750 per person.
